Agilent Technologies Vacuum Products Division

121 Hartwell Avenue
Lexington, MA 02421
Tel: 781-860-542

Agilent Technologies, Vacuum Products Division (formerly Varian, Inc.), is a world leader providing science researchers with total vacuum solutions for more than 60 years. Product lines include ion pumps, turbo-molecular pumps, dry roughing pumps, gauging, hardware, leak detectors, and custom pumping systems. We provide dry vacuum from the ground up, from rough vacuum to UHV, as well as the vacuum measurement instrumentation and leak detection you need to stay up and running.

Anest Iwata Air Engineering, Inc.

5325 Muhlhauser Rd.
Hamilton, OH 45011
Tel: 800-440-0282
Fax: 513-755-0888
www.anestiwata.com

ANEST IWATA was the first to develop the air-cooled oil-free scroll type vacuum pump in 1993. Our oil-free scroll vacuum pumps are more compact, have less vibration and have less noise than other dry vacuum pumps. Our oil-free dry scroll vacuum pumps are highly regarded for their quality and simplicity of design. Flow ranges from 60L/min to 1200L/min and 15Pa to ≤ 1 Pa. ISP-1000+base_k Anest Iwata vacuum pumps are used in Synchrotrons, Accelerators, Leak Detectors, Sputtering Equipment, Vapor Deposition, SEM, Material Handling, Vacuum Furnaces and many more. When your needs call for clean dry scroll technology please contact us at 800-440-0282, www.anestiwata.co. Contact: Cort Stein corts@anestiwata.com or 513-444-5493.

Newport Corporation

1791 Deere Avenue
Irvine, CA 92606
Tel: 949-863-3144
Fax: 949-253-1680
www.newport.com

Newport Motion, over 50 years supplying micro-precision motion control products and expertise to industry, from standard linear systems, rotation stages, actuators, and controllers to specialized air bearings and custom motion systems. Addressing demanding applications in semiconductor, metrology, inspection, and research that require micron or nanometer precision, and global support and service.

A&N Corporation

707 SW 19th Avenue
Williston, FL 32696
Tel: 352-528-4100
Fax: 352-528-3441
www.ancorp.com

Established in 1965, A&N Corporation manufactures high- and ultra-high-vacuum fittings, valves, and chambers used in labs for researching materials, physics, and semiconductors, as well as for surface analysis. A&N maintains an extensive inventory of vacuum components to ship orders the same or next day. Our state-of-the-art manufacturing facility and corporate headquarters are located in Williston, Florida. We have representatives and distributors throughout North America, Europe, and Asia providing local support.

Advanced Design Consulting USA, Inc.

126 Ridge Road
P.O. Box 187
Lansing, NY 14882
Tel: 607-533-3531
www.adc9001.com

ADC Corp. is an engineering and scientific consulting firm providing solutions to complex problems. The company provides devices, integrated systems, and a broad array of high-precision components and instruments to commercial, neutron, academic, and government agencies worldwide. ADC's innovative solutions leverage its expertise in precision robotics, sub-micron positioning systems (linear stages), neutron applications, and optical subsystems to enhance the capabilities and productivity of its customers' manufacturing, engineering, and research applications.

Advanced Research Systems, Inc.

7476 Industrial Park Way
Macungie, PA 18062
Tel: 610-967-2120
Fax: 610-967-2395
www.arscryo.com

Advanced Research Systems (ARS) provides standard and custom cryogenic solutions for low-temperature (4 – 800 K) material characterization. ARS manufactured pneumatic drive closed cycle cryocoolers are ideally suited for R&D applications where low temperature and low vibration are important. ARS is uniquely qualified to design and manufacture customized cryogenic solutions, as we can seamlessly integrate our cryocoolers into the final design. Cryogenic probe stations and cryostats with standard and custom configurations are available for a wide range of applications, including beamline science, electrical transport, magnetic properties, micro-spectroscopy, neutron science, optical spectroscopy, X-ray diffraction, and more.

Aerotech, Inc.

101 Zeta Drive
Pittsburgh, PA 15238
Tel: 412-963-7470
Fax: 412-963-7459
www.aerotech.com

Aerotech direct-drive linear and rotary air-bearing stages provide unsurpassed performance for precision tomography and crystallography applications. Our new QNP Piezo Nanopositioners and QLAB Piezo Controller offer sub-nanometer resolution and best-in-class stiffness and resonant frequency in a compact package, making them the ideal solution for high-performance, space-constrained applications such as interferometry, microscopy and precision alignment. In addition, Aerotech manufactures drives and motion controllers that perfectly complement all of our stages. Aerotech's Ensemble stand-alone motion controller is compatible with the EPICS set of software tools and applications, making it ideal for use in synchrotron and general laboratory facilities.

**Alan Burrill Technical Sales**

8129 W. Lincoln Avenue
West Allis, WI 53219
Tel: 414-327-9055
Fax: 414-327-8131
www.aburrilltechsales.com

Manufacturer's representative firm offering vacuum and thin-film-related products for industry and research, featuring the products of Applied Vacuum Technology, Osaka Vacuum Products, MPF Products, Atlas Technologies, and InstruTech Vacuum gauges.

Applied Diamond, Inc.

3825 Lancaster Pike
Wilmington, DE 19805
Tel: 302-999-1132
Fax: 302-999-8320
www.usapplieddiamond.com

Applied Diamond manufactures a variety of x-ray optics, including beam position monitors, vacuum windows, refractive lenses and attenuators from diamond. Either polycrystalline or single-crystal diamond can be used to solve problems of heat load, scattering losses, and precision. A wide variety of mounting options are available for application in cryo, ultra-high-vacuum, corrosive, or high-temperature environments. Custom designs are our standard.

attocube systems, Inc.

2020 Stuart Street
Berkeley, CA 94703
Tel: 510-649-9245
www.attocube.com

attocube is a worldwide supplier for ultra-high-precision piezo positioning systems and multi-axis interferometric displacement sensors. The company offers piezodriven technology with extremely rugged yet cost efficient design, and attocube's patented and R&D100 award-winning fiber interferometer can be applied to multi-purpose displacement measurements, as needed in extreme environmental positioning applications, coordinate measurement machines, or micro-machining applications. The hexaCUBE, one of attocube's newest developments, is a sophisticated 6D multi-axis motion solution with an innovative assembly of high-precision ball joints and linear bearings. The extremely stiff design, long travel ranges, stunning accuracy, and nanometer repeatability make it one of the most precise multi-axis motion systems currently available on the market.

Barnett Technical Services

5050 Laguna Boulevard
Suite 112-620
Elk Grove, CA 95758
Tel: 916-897-2441
Barnett-Technical.com

Barnett Technical Services (BTS) is a consulting and distribution company working in the general field of optical methods for material analysis. At the Users Meeting, BTS will be discussing the following products:

Micro Support micromanipulators, for fine sample manipulation using software-controlled actions to control sample and probe motions.

Attolight's cathodoluminescence (CL) products, for high-resolution CL imaging for semiconductor and thin film battery characterization.

Tokyo Instruments Raman imaging systems, for rapid and high-resolution Raman imaging.

Applied Spectra's LIBS and LA-ICP-MS instrumentation for elemental analysis and depth profiling.

BellowsTech, LLC

1289 N US Highway 1
Suite #1
Ormond Beach, FL 32174
Tel: 386-615-7530
Fax: 386-615-7973
www.bellowstech.com

BellowsTech edge-welded metal bellows are manufactured for ultra-high-vacuum and positive pressure applications. With various material options, BellowsTech can manufacture bellows from high-strength alloys or stainless steel. AM 350 Bellows offer high cycle life, low helium leak rates, and maximum performance. 316L bellows operate in cryogenic temperatures and are nonmagnetic. For specialty applications, edge-welded bellows can be manufactured from titanium, Inconel, Monel, or Hastelloy. BellowsTech offers standard and custom designs in one piece and high volume production quantities. Our various size options match most existing requirements, ensuring competitive pricing and short lead times. BellowsTech offers assembly services to minimize the amount of effort required to install the bellows. BellowsTech's sister company, Servometer®, manufactures precision electroformed components, including bellows, electrical contacts, and couplings. Servometer products can be manufactured as small as 0.5 millimeter in diameter. Electro-formed bellows compliment edge-welded bellows in size and customization capabilities. Electrical contacts are used in test and circuit board assemblies whereas bellows couplings are commonly used in precision motion control instruments such as servos and micro-motors.

Bruker

3400 E Britannia Drive
Suite 150
Tucson, AZ 85706
Tel: 520-741-1044
Fax: 520 294-1799
www.bruker.com

Bruker provides high-performance, quality instrumentation to advance your research. Our world-class technologies include atomic force microscopes with PeakForce Tapping®, nanoindenters, material testers, 3D optical microscopes, stylus profilers, and FTIR spectrometers. Visit our table to learn more about the latest innovations at Bruker: Vertex FM is the world's first FTIR spectrometer that covers the complete mid- and far infrared/THz spectral ranges in one step with no gaps! VERTEX FM combines a unique wide-spectral range beamsplitter, a new wide-range detector and IR source to cover the spectral range from 6000 cm⁻¹ down to 50 cm⁻¹ in one step for all types of transmittance, reflectance, and ATR measurements. UMT TriboLab, introduced in December, is a newly designed modular universal mechanical tester with larger load capacity, higher torques, and unmatched ease of use. The UMT TriboLab has a universal base that can be equipped with a range of drive modules to allow multiple, different tribology tests to be performed on one platform.

Exhibitors/Sponsors

Canberra Industries, Inc.

800 Research Parkway
Meriden, CT 06450
Tel: 203-639-2148
Fax: 203-235-1347
www.canberra.com

Canberra is the world-leading supplier of innovative and cost-effective nuclear measurement solutions and services used to maintain safety of personnel, assess the health of nuclear facilities, and safeguard the public and the environment.

Carl Zeiss Laser Optics GmbH

Carl-Zeiss-Strasse 22
73447 Oberkochen
Germany
Tel: +49 7364205971
Fax: +49 7364202967
www.zeiss.com/lo

Carl Zeiss Laser Optics is a reliable partner for the manufacturing of synchrotron mirrors. We implement powerful metrology and manufacturing techniques for the upcoming generation of highest quality optical components for synchrotron radiation and other x-ray applications.

CINEL Strumenti Scientifici SRL

Via Dell'Artigianato, 14-14/A
35010 Vigonza (Padova)
Italy
Tel: +39-049-725022
Fax: +39-049-8931881
www.cinel.com

Founded in 1979, Strumenti Scientifici CINEL is an established supplier of components and integrated systems for synchrotron, XFEL light sources, and particle accelerators. We provide innovative and tailored solutions for integrated UHV systems, complete beam lines, and beamline components (mirror systems, monochromators, etc.). Our combination of in-house expertise in precision design and engineering, metrology, assembly and integration, vacuum, and, last but not least, our precision manufacturing capabilities, which allows us to produce every single part of our instruments, makes Strumenti Scientifici CINEL the partner of choice to realize challenging and state-of-the-art instruments for your beam lines.

COSMOTEC, Inc.

229 Polaris Avenue, Suite 3
Mountain View, CA 94043
Tel: 408-428-9741
Fax: 408-428-9742
www.cosmotec.us

Japan's #1 ceramic-to-metal, hermetic sealing, electrical feedthroughs are now available in America. We work very closely with our clients, scientists, corporations, researchers, government labs, universities, and individuals. Cosmotec respects the accomplishments or achievements of the people involved. This is what we have been doing in Japan for more than 20 years. We will amaze you with our custom manufacturing capabilities. Whether it is a "one quantity" order, Cosmotec will work at its best to not let our clients down. We will "work together" with our clients and find the best solution. Whether they are isolators, ceramic feedthroughs, coaxial and multi-pin connectors, coaxial connectors, multi-pin connectors, double-ended connectors, floating coaxial connectors, multi-pin connectors, ceramic chambers, beam positioning monitors (BPM), isolator flanges, ceramic isolator flanges, sapphire windows, single-crystal sapphire material, ceramic-to-metal bonding technology, we will provide solutions.

DMS, Inc.

1128 Mary Lane
Naperville, IL 60540
Tel: 630-983-1704
Fax: 630-983-1705
darcymicro.wix.com/dmswix

DMS is a manufacturers' representative providing sales and support of the latest technologies in high-resolution microscopic and spectroscopic nanoscience imaging. Products on display include nano-FTIR imaging and spectroscopy systems from Neaspec GmbH. Neaspec is dedicated to delivering innovative solutions for nanoscale optical imaging and spectroscopy for researchers in industry and academic institutions. Neaspec's NeaSNOM – the ultimate nanoanalytic microscopy platform for materials research and photonics – enables optical analysis of complex material systems at visible, infrared, and terahertz frequencies, at a spatial resolution of 10 nm on inorganic and organic samples for both steady-state and time-resolved studies. Also on display will be AFM systems from JPK, the recognized world leader in SPM, with proven highest resolution, lowest noise, and fastest scanning of any SPM systems. JPK Nanowizard 3 systems can be combined with a variety of optical microscopes (upright, inverted, CLSM), and are the only systems providing simultaneous real-time optical and scanning probe imaging of samples. JPK's tip scanning design is ideal for all sample types, including the most challenging soft matter and biological samples and samples in liquids. The new Nanowizard 3 Ultraspeed represents the next generation in SPM, with up to 250 Hz scan rates at highest resolution levels operating in closed loop.

EBARA Technologies Inc.

51 Main Avenue
Sacramento, CA 95838
Tel: 916-920-5451
Fax: 916-925-6654
www.ebaratech.com

EBARA is a global innovator/local provider of vacuum pumps and advanced exhaust management solutions for semiconductor, photovoltaic, thin films, and R&D. EBARA's products are backed by a superior global service network. EBARA continues to expand its role by bringing to the market dry vacuum pumps, turbomolecular pumps, and point-of-use abatement.

**FMB Oxford**

Unit 1 Ferry Mills
Osney Mead
Oxford
OX2 0ES
United Kingdom
Tel: +44 1865-320300
Fax: +44 1865-320301
www.fmb-oxford.com

FMB Oxford is a well-established leader in the supply of beamlines and components to the scientific community, specializing in the design, assembly, test, installation, and commissioning of high-value systems. With more than 20 years' experience in the global synchrotron industry, FMB has built an extensive product range and continues to work with its customers and other experts in the community to expand and develop this range to provide new solutions capable of supporting the increasing demands of the science. FMB Oxford continues to grow and improve every year. The company has the design capability and manufacturing capacity to handle any beamline needs, whether these are for the smallest component or for multiple beamlines. We have a large number of employees with more than 10 years of experience in the field. Most instruments have the benefit of being evolved designs, refined over multiple deliveries. Continual investment in new production, test and design facilities, together with the recruitment and development of key staff, ensures that FMB Oxford remains at the forefront of beamline system supply. Please take a little time to look at our website to view our advanced and expanding range of products. If you can't find what you are looking for, do not hesitate to contact us at enquiries@fmb-oxford.com for further assistance or advice.

Hergo, Inc.

56-01 55th Avenue
Maspeeth, NY 11378
Tel: 888-222-7270
Fax: 888-410-0671
www.hergo.com

NYC-based Hergo designs, manufactures, and markets an extensive line of functionally engineered modular technical office furniture, including open computer racking systems, lab furniture, data center consoles, 19" enclosures/cabinets and relay racks, flat panel monitor arm solutions, mobile and hospital carts, personal workstations and computer desks, and power and cable management solutions.

Hiwin Corp.

1400 Madeline Lane
Elgin, IL 60124
Tel: 847-827-2270
Fax: 847-827-2291
www.hiwin.com

Hiwin Corp. manufactures an extensive line of both linear motion components and complete solutions. With a goal of supplying superior quality at the most competitive prices, the company offers a variety of precision ground and rolled ballscrews, linear guideways, electric actuators, ballscrew-driven stages, and linear motors, with many fully integrated, value-added features.

Huber Diffraction

8344 West Avenue C4
Lancaster, CA 93536
Tel: 949-391-7755
xhuber.com

Huber Diffraction designs and manufactures high-precision positioning systems primarily used for x-ray diffraction in laboratories and at synchrotron beam sources. Other application fields are diffraction experiments with neutrons, laser technology, astronomy, and precise measurement technology.

Instrument Design Technology Ltd.

Unit 2, Turnstone Business Park
Mulberry Avenue
Widnes
WA8 0WN
United Kingdom
Tel: +44 1516014111
Fax: +44 1516014112
www.idtnet.co.uk

Instrument Design Technology (IDT) provides the world's synchrotron community with a design-and-build resource in state-of-the-art mechanical high-precision instrumentation. IDT is fully compliant with the latest quality management system, ISO-9001. IDT has core competencies in design and build of complex, state-of-the-art, instruments with motion in multiple degrees of freedom, often working in an ultra-high-vacuum (UHV) environment. Complex optical engineering of x-ray and other beamlines is provided, very often with novel concepts being incorporated. We have a growing reputation for novel monochromators with exceptional proven performance in the field.

KOHZU Precision Co., Ltd.

2-6-15 Kurigi
Asao-ku
Kawasaki Kanagawa 215-8521
Japan
Tel: +81 44-981-2131
Fax: +81 44-981-2181
www.kohzuprecision.com

We provide double-crystal monochromators, vacuum positioning stages, precision rotation stages, alignment stages, and custom products! Please feel free to contact us!

Kurt J. Lesker Company

1925 Route 51
Jefferson Hills, PA 15025
Tel: 412-387-9007
Fax: 412-384-7563
www.lesker.com

Manufacturer/distributor of standard and custom high-vacuum and UHV chambers and sub-assemblies, standard and custom vacuum hardware, feedthroughs, and valves, and vacuum pumps of all types. Manufacturer of thin-film deposition systems for sputtering, electron beam, thermal evaporation, and atomic layer deposition. Exclusive North American representative for UHV Design Ltd. motion devices.

Lake Shore Cryotronics, Inc.

575 McCorkle Boulevard
Westerville, OH 43082
Tel: 614-891-2244
Fax: 614-818-1600
www.lakeshore.com

Supporting advanced research since 1968, Lake Shore Cryotronics is a leading innovator in measurement and control solutions for materials characterization under extreme temperature and magnetic field conditions. High-performance product solutions from Lake Shore include Cernox™, germanium, and ruthenium oxide NTC RTDs; silicon and GaAlAs diodes; and platinum PTC RTDs, as well as temperature controllers, temperature monitors, AC resistance bridges, and current sources. Lake Shore serves an international base of scientists at leading university, government, and commercial research institutions and is supported by a global sales network.

Mantis Deposition, Inc.

2839 Wyandot Street
Denver, CO 80211
Tel: 303-995-5855
Fax: 763-390-0047
www.mantisdeposition.com

Mantis Deposition and its affiliates are dedicated to the development and manufacture of high-quality systems and components for cutting-edge applications in nanotechnology, thin film deposition, and surface analysis. We enable researchers to both create and analyze the latest materials for advanced materials and device development. Mantis specializes in nanoparticle deposition, RF atom and ion techniques, UHV sputtering, e-beam, MBE, and PLD. We offer a range of nanoparticle deposition sources and systems, sputter cathodes with optional *in situ* tilt, RF atom and RF ion sources, mini e-beam evaporators, organic evaporators, and thermal gas crackers as well as modular UHV and HV R&D deposition systems that can be customized for your application. Our new partner Sigma Surface Science offers state of the art new ESCA and SPM technology with an exciting new hemispherical analyzer, ESCA software, and low-temperature SPM. Mantis and Sigma's highly skilled teams of engineers, physicists, and designers will be happy to work with you on your next materials deposition and analysis challenges.

Materion Electrofusion

44036 South Grimmer Boulevard
Fremont, CA 94538
Tel: 510-623-1500
Fax: 510-623-7600
www.materion.com

Leader in the fabrication of CF flange-mounted beryllium windows, water-cooled window assemblies, complex chambers and beam pipes suitable for UHV. Beryllium windows are available in a range of purity levels (98.5% to 99.8%) and thicknesses (6.35 mm to 8 µm). We have extensive in-house fabrication capability and a variety of joining technologies including electron beam welding, vacuum furnace brazing, and cost-effective epoxy bonding. In 2014 we received CERN's CMS Crystal Award for our excellence and innovation in supplying the beam pipe for the CMS Experiment station.

McCrone Group

850 Pasquinelli Drive
Westmont, IL 60559
Tel: 630-887-7100
Fax: 630-887-7764
www.mccrone.com

The McCrone Group is internationally recognized as a world leader in microscopy and microanalysis and includes McCrone Associates, McCrone Microscopes & Accessories, and Hooke College of Applied Sciences. McCrone Associates is focused on solving the most difficult materials and particle identification problems. McCrone Associates' scientists consult directly with clients and use the most advanced microscopy techniques and instrumentation to solve their problems. McCrone Microscopes & Accessories is the authorized dealer for Nikon microscopes and measuring equipment, Linkam high-temperature and X-ray stages, the JEOL NeoScope benchtop SEM with EDS, digital imaging systems, and a variety of laboratory supplies. The technical sales representatives at McCrone Microscopes are trusted advisors to scientists worldwide. Hooke College of Applied Sciences provides education and training to scientists worldwide, specializing in SEM and TEM instruction. Hooke College of Applied Sciences has more than 40 specialized short courses in materials analysis. Topics covered include light and electron microscopy, spectroscopy, sample preparation, chemistry and laboratory safety, and image analysis. The online McCrone Atlas of Microscopic Particles is a free, online particle reference for scientists, microscopists, and criminalists engaged in materials characterization and particle identification.

MEWASA AG

Straubstrasse 11
CH-7323 Wangs
Switzerland
Tel: +41 794676518
www.mewasa.ch/index_en.htm

For the past 19 years, MEWASA (ISO 9001:2008) has been recognized globally as a highest quality supplier of precision metal welded bellows and bellows assemblies for various HV/UHV beam lines and end station processes at LBNL, NSCL, CERN, SLAC, DESY, PSI, ALBA, NASA, and at many university R&D physics and scientific programs. We are dedicated to process manufacturing excellence. MEWASA's niche is focused on the rapid delivery from prototype to production quantities for our customers' needs. Our scope of business includes in-house design engineering (at no extra charge) to support our customers' design activities, and our proactive involvement in qualifying and validating their bellows specifications, including axial and lateral stress testing for both static and dynamic environments. MEWASA provides a written guarantee/warranty on all our manufactured bellows, and all bellows are leak-tested and certified to 1×10^{-9} cc (STP)/second (helium).

MICRONIX USA / Symetrie

15375 Barranca Parkway
Suite E-106
Irvine, CA 92618
Tel: 949-480-0538
www.micronixusa.com

MICRONIX USA supplies micro- and nano-positioning equipment with a focus on the research market. We offer a full range of precision positioners, hexapods, and control electronics, as well as complete system integration services. Additionally, MICRONIX USA is known as the premier supplier for vacuum to 10-10 torr, clean room, and extreme temperature applications. MICRONIX USA is the exclusive U.S. distributor for Symetrie high-precision hexapods.

**Midwest Vacuum, Inc.**

15 Spinning Wheel Road
Suite 120
Hinsdale, IL 60521
Tel: 630-323-5399
Fax: 630-323-2142
www.midwestvacuum.com

Midwest Vacuum, Inc. has celebrated 30 years of supplying the ultra-high-vacuum community with chambers, valves, pumps, instrumentation, and special solutions to vacuum problems. We also handle helium leak-detection equipment and service.

Molmex Scientific, Inc.

518 Pleasant Street
Northampton, MA 01060
Tel: 413-587-4000
www.molmexscientific.com

Molmex Scientific, Inc. is the North American distributor for the Dectris product line of hybrid pixel detectors and the SAXSLAB Small Angle X-ray Scattering systems for the home lab and synchrotron and represents JJ X-Ray in the United States and Canada for custom beamline solutions. We have more than 30 years of experience in the fabrication of x-ray scattering instrumentation and are located in Northampton, MA.

Navitar

200 Commerce Drive
Rochester, NY 14623
Tel: 585-359-4000
www.navitar.com

Navitar designs, develops, manufactures, and markets precision optical solutions for a wide variety of industries, including biomedical and life sciences, defense and security, industrial imaging, and projection, spanning from standard video to 4K planetarium lenses. Offerings include high-magnification zoom and fixed lenses, such as the new MicroMate 3:1 Zoom for 4/3" sensors, MagniStar double-sided telecentric lenses, microscope objectives, modular microscopy components, and custom lens design. Applications for Navitar optics include machine vision, automation, assembly, imaging, testing, measuring, metrology, biometrics, telecommunications, photonics R&D, noncontact measurement, simulation, planetarium, amusement, and more.

Newark

1400 Charles Avenue
Algonquin, IL 60102
Tel: 847-757-0118

www.newark.com Newark element14 is a high-service distributor of technology products, services, and solutions for electronic system design, maintenance, and repair. Newark brings together the latest products, services, and development software, all connected to an innovative online engineering community where purchasers and engineers can access peers and experts, a wide range of independent technical information, and helpful tools. Whether researching a new technology, designing an electronic product, or looking for parts to repair an existing system, we are the trusted global source to find the answers and parts you need to keep your project on the fast track, right from the start. Additional information is available at www.newark.com Keysight Technologies (www.keysight.com) is a global electronic measurement technology and market leader helping to transform its customers' measurement experience through innovations in wireless, modular, and software solutions. Keysight's electronic measurement instruments, systems, software and services are used in the design, development, manufacture, installation, deployment and operation of electronic equipment.

nPoint, Inc.

3030 Laura Lane
Suite 100
Middleton, WI 53562
Tel: 608-824-1770
Fax: 608-824-1774
www.npoint.com

Designs and manufactures nano-positioning tools for OEM and research applications. Products include piezo-actuated flexure stages and digital control electronics. Nano-positioning systems provide closed-loop translation in the X, XY, XYZ, and tip/tilt. Enables high-speed, high-resolution, sub-nanometer precision for the optics, semiconductor, defense, aerospace, and biological industries.

Oerlikon Leybold Vacuum

5700 Mellon Road
Export, PA 15632
Tel: 724-327-5700
www.oerlikon.com/leyboldvacuum/

Oerlikon Leybold Vacuum is one of the world's leading suppliers of vacuum equipment, components, and systems to the semiconductor, industrial coating, metallurgy, solar, R&D, analytical, and scientific instrument markets. Our wide range of products include conventional ceramic bearing turbomolecular pumps, magnetic bearing turbomolecular pumps, oil-sealed rotary vane mechanical pumps, dry compressing scroll pumps, vacuum gauges, helium leak detectors, cryopumps, mechanical boosters and diffusion pumps. We also offer extensive engineering services for customized pumping systems, including our line of UNIVEX high vacuum deposition systems for PVD applications, such as RF/DC sputtering, thermal resistance evaporation, electron beam evaporation and ion beam assisted deposition. In addition, we also provide repair services for all brands of vacuum pumps. Our Vacuum Academy offers training courses in fundamental vacuum principles, practical leak detection, instrumentation, or maintenance and repair of your specific vacuum pumps. We can also customize a vacuum course to meet your specific needs. The very affordable courses are offered either at our facility in Export, Pennsylvania, or on-site at your facility. For more information or to receive a quote on any of our products or services, please contact us at info.vacuum.ex@oerlikon.com.

Olympus America Inc.

3500 Corporate Parkway
Center Valley, PA 18034
Tel: 484-896-5844

Olympus Scientific Solutions Americas, a part of the global Olympus life science and industrial instrumentation business, delivers solutions for clinical, educational, and research microscopes, nondestructive testing equipment, and analytical instruments. Designed to contribute to the safety, security, quality, and productivity of society, Olympus strives to enhance people's lives every day.

OMS Motion, Pro-Dex

15201 NW Greenbrier Parkway, B-1
Beaverton, OR 97006
Tel: 800-707-8111
Fax: 503-629-0688
www.OMSmotion.com

OMS Motion is committed to its customers' success, providing world-class motion control solutions in applications of all types. Whether it's vital medical analysis, precise semiconductor equipment or advanced scientific research, engineers depend on the proven reliability that OMS provides. OMS Motion, located in Beaverton, Oregon, is a division of Pro-Dex, Inc., a publicly traded company, and has been successfully producing motion controllers for more than 30 years. OMS was founded as Oregon Micro Systems (OMS) and evolved from patented motion control technology that provides superior advantages in the industry. OMS built a strong reputation in the market for reliable and quality motion control products backed by superior customer service and technical support. OMS motion controllers control up to 10 axes of motion on a single controller. Applications of these controllers include semiconductor and medical equipment, life sciences, and factory automation markets, as well as major research projects at facilities around the world. In addition to creating multi-axis motion controllers, OMS offers motors, drives and accessories that are often tailor-made to support specific applications. OMS provides the experience, proven reliability and accuracy that gain the trust and confidence of design engineers worldwide.

PI (Physik Instrumente) L.P.

16 Albert Street
Auburn, MA 01501
Tel: 508-832-3456
Fax: 508-832-0506
www.pi-usa.us

PI/PI miCos is a leading supplier of high-precision positioning and motion-control products for beam-line instrumentation, nanotechnology and microscopy applications. PI employs more than 750 people worldwide and provides the broadest and deepest portfolio of motion technologies, from piezo ceramics to air-bearing stages. Two of our products were selected for the Mars Rover Curiosity science lab because of their excellent performance and reliability.

Princeton Instruments

3660 Quakerbridge Road
Trenton, NJ 08619
Tel: 609-587-9797
Fax: 609-587-1970
www.princetoninstruments.com

Princeton Instruments designs and manufactures high performance CCD, ICCD, and EMCCD cameras, spectrographs, and optics-based solutions for the scientific research, industrial imaging, and OEM communities. We take pride in partnering with our customers to solve their most challenging problems in unique, innovative ways.

Rayonix, L.L.C.

1880 Oak Avenue
Suite 120
Evanston, IL 60201
Tel: 847-869-1548
Fax: 847-869-1587 www.rayonix.com/

Rayonix, L.L.C. is the leading developer of innovative x-ray detector technologies. Five Rayonix high-speed x-ray detector systems are now installed at APS! The Rayonix frame-transfer CCD facilitates data collection at up to 140 frames/second. These high-speed x-ray detectors have no count rate limitation. New detector designs, including the MX170-HS with a center hole, allow the direct beam to pass through, for simultaneous SAXS/WAXS data collection. Talk to us for custom versions of our detectors for specific needs.

Renishaw, Inc.

5277 Trillium Boulevard
Hoffman Estates, IL 60192
Tel: 847-286-9953
Fax: 847-286-9974
www.renishaw.com

Renishaw, Inc. is a global company with core skills in measurement, motion control, spectroscopy, and precision machining. The company develops innovative products that significantly advance customers' operational performance—from improving manufacturing efficiencies and raising product quality to maximizing research capabilities and improving the efficacy of medical procedures.

Rigaku Innovative Technologies, Inc.

1900 Taylor Road
Auburn Hills, MI 48326
Tel: 248-232-6400
Fax: 248-232-6500
www.Rigaku.com

With more than 25 years of producing multilayer x-ray optics, Rigaku Innovative Technologies has introduced many new developments in instruments and optics to the synchrotron community. Our division of Rigaku designs and builds multilayer optics and rotary vacuum feedthroughs for synchrotron beamlines and end stations. Come learn about our new and innovative multilayer material systems and advanced focusing monochromators for beamlines. Also new is our 2-D Kratky SAXS camera that can be mounted on a beamline end station. Our capabilities include multiple-stripe double monochromators, graded d-spacing structures, and coatings on complex optical shapes. We have recently expanded our coatings capabilities and commissioned our new large format in-line deposition system capable of multilayer structures on 700 mm diameter substrates. Based in Michigan with an extensive portfolio of x-ray optic patents, our renowned team of scientists at Rigaku-Osmic can help solve your most difficult multilayer optic applications.

SAES Getters USA Inc.

1122 E. Cheyenne Mountain Boulevard
Colorado Springs, CO 80906
Tel: 719-576-3200
Fax: 719-576-5025
www.saesgetters.com

SAES Group has offered a wide range of compact UHV pumping solutions based on non-evaporable getter (NEG) technology since the 1970s. In the 1990s, SAES pioneered pumps based on sintered porous disks, improving the pumping performance while achieving superior mechanical stability, thus drastically reducing the chance of particle release. Currently, SAES offers a variety of compact, mechanically stable, and simple-to-operate pumps with unparalleled pumping performance in HV, UHV, and XHV.

**Scientific Instruments, Inc.**

4400 W. Tiffany Drive
West Palm Beach, FL 33407
Tel: 561-881-8500
Fax: 561-881-8556
www.scientificinstruments.com

Scientific Instruments, Inc., is a manufacturer of cryogenic sensor and instrumentation products and is also involved in the aerospace, liquid natural gas, industrial, and aircraft industries.

SGX Sensortech (MA) Ltd.

Sirius House, Watery Lane
Wooburn Green
High Wycombe
HP10 0AP
United Kingdom
Tel: +44 1628-533060
Fax: +44 1628-533034
www.sgxsensortech.com

SGX Sensortech has a distinguished heritage in the manufacture of silicon drift detectors (SDD) and Si(Li) detectors. Previously known as e2v scientific and Gresham Scientific, SGX specializes in producing detectors from standard designs through customized assemblies to complex multi-element detectors. All detectors are designed to meet the highest specifications, including the largest single active area (170 mm²) available of its kind.

- ▶ Multi-element silicon drift detectors: SDD SGX Sensortech offers custom multi-sensor silicon drift detector design capability for special applications. Detectors are available with discrete or monolithic arrays of sensors covering a range of active areas and window types, all built for optimum performance.
- ▶ Customized multi-element detectors: SDD designs are available to suit geometrical constraints and special applications. Applications include x-ray fluorescence (XRF), micro x-ray fluorescence (μ XRF), total reflection x-ray fluorescence (TXRF), particle induced x-ray emission (PIXE), extended x-ray absorption fine structure (EXAFS), and x-ray absorption near edge structure (XANES).

SPECS Surface Nano Analysis, Inc.

20 Cabot Boulevard
Suite 300
Mansfield, MA 02048
Tel: 508-618-1292
Fax: 508-618-1334
www.specs.com

SPECS manufactures cutting-edge systems and components for surface analysis in UHV, based on methods such as XPS, UPS, AES, ISS, STM, LEEM/PEEM, LEED, SIMS, SNMS, and HREELS. We offer a variety of sources for deposition, excitation, and charge neutralization, as well as analyzers, monochromators, and research microscopes like LEEM and STM. A strong focus of our work is on customized systems combining thin-film preparation (MBE) with spectroscopic and microscopic options.

Spectral Instruments

420 N. Bonita Avenue
Tucson, AZ 85745
Tel: 520-884-8821
www.specinst.com

Spectral Instruments specializes in the development and manufacture of cooled CCD cameras for demanding low-light applications. We provide the finest low noise ($<3e^-$), high sensitivity, -110°C cooling, 16-bit CCD cameras that current technology can offer. Optical inputs can include windows with custom coatings through fiber optic tapers or faceplates. Readout options are designed to be flexible and customized to the application. Custom CCD designs and OEM camera production are available.

Starrett Tru-Stone Tech

1101 Prosper Drive
Waite Park, MN 56387
Tel: 320-251-7171

Precision granite design collaboration, production, and assembly services. Starrett Tru-Stone Technologies specializes in precision granite machine bases and assemblies. We partner with you to add expertise in design collaboration; high-quality, on-time manufacturing; and complex assembly for your precision base. In addition to granite bases, Tru-Stone technicians install precision rails, air mounts, brackets, pneumatic systems, and cabling. Custom stands are also provided. Materials beyond granite include ceramic and carbon fiber.

TDK-Lambda Americas High Power Division

405 Essex Road
Neptune, NJ 07753
Tel: 732-922-9300
Fax: 732-922-1441
www.us.tdk-lambda.com/hp/

TDK-Lambda Americas High Power Division, located in Neptune, New Jersey, is a manufacturer of programmable, high-density power supplies. The Genesys™ series of programmable power supplies has the highest density in power levels from 750W through 15KW, with output ranges up to 600V and 1,000A. TDK-Lambda Genesys™ Series of programmable power supplies has the highest density, making the Genesys™ Series the most complete set of platforms with identical user interfaces. Platforms include 750 W, 1500 W, 3.3/5 kW and 10/15 kW output. Outputs available range up to 600 V and 1,000 A. In addition to saving space, Genesys™ power supplies contain extensive standard features that provide a new level of performance and flexibility. Also now available, an optional LXI Certified LAN interface provides flexible system integration and functionality.

Tek-Matic Inc.

7324 Forest Hills Road
Loves Park, IL 61111
Tel: 815-282-1775
Fax: 815-282-1862
www.tek-matic.com

Tek-Matic partners with lab automation companies providing precision motion, sensing, and vision camera products, assemblies and systems. Tek-Matic provides sizing, selection, logistics, training, and unparalleled support. Available products include USB/E-net based stepper/servo products, measurement sensors, positioning systems and actuators, piezo motors/stages for sample and optics manipulation, precision microscope stages, and OEM vision cameras.

The Fredericks Company/TELEVAC

2400 Philmont Avenue
Huntingdon Valley, PA 19006
Tel: 215-947-2500
Fax: 215-947-7464
www.TELEVAC.com

The Fredericks Company/TELEVAC has been providing innovative vacuum solutions for more than 80 years. Our instruments and sensors are regarded as the gold standard in the vacuum industry. TELEVAC's double inverted magnetron patented technologies have revolutionized the vacuum industry, providing rugged and reliable performance cold cathodes and instruments. We have been developing new products to serve the vacuum industry in many of its diverse applications, including national labs, heat treating, thin-film coating, and many others. For more information, please contact us at 215-947-2500 or visit our website at www.TELEVAC.com.

www.vacom-vacuum.com

VACOM® is one of the European market leaders for vacuum technology and is active worldwide. Founded in 1992, the family-owned enterprise has grown continuously and today employs more than 200 staff members, a high proportion being scientists and highly qualified technicians. Its leading brand Precision & Purity stands for the highest demands in UHV, XHV, and UCV. Core areas of expertise are vacuum hardware, vacuum measurement, vacuum optics, electrical feedthroughs, and ion getter pumps. In addition, VACOM® is specialized in custom components and service. This includes innovative technologies to ensure that products meet requirements for cleanliness and low outgassing and that they are free of particles. The spacious production and technology center is equipped with the latest machinery and includes 800 m² of clean room facilities. VACOM® is specialized in vacuum components, customized systems and ultra-clean vacuum, including innovative optical solutions that meet challenging demands in science and industry. VACOM® is a partner of high-tech industry companies, e.g., in the fields of analytics, semiconductors (including EUV), optics, solar, and accelerator technologies, and cooperates with research institutes worldwide.

ANEST IWATA was the first to develop the air-cooled oil-free scroll type vacuum pump in 1993.

Our oil-free scroll vacuum pumps are more compact, have less vibration and have less noise than other dry vacuum pumps. Our oil-free dry scroll vacuum pumps are highly regarded for their quality and simplicity of design. Flow ranges from 60L/min to 1200L/min and 15Pa to ≤ 1 Pa

Anest Iwata vacuum pumps are used in Synchrotrons, Accelerators, Leak Detectors, Sputtering Equipment, Vapor Deposition, SEM, Material Handling, Vacuum Furnaces and many more. When your needs call for clean dry scroll technology please contact us at 800-440-0282 www.anestiwata.com
